

ST. DAVID'S HIGH SCHOOL

ICT VISION POLICY

**Reviewed by Governors
October 2024**

ICT Vision

The staff and senior management at St David's High School believe that every student at the school will develop the required skills in ICT that will help them throughout their lives. Students will have the skills to learn and adapt to the constant development of new technologies.

Every student will have access to ICT facilities that will help them to work independently and choose different pathways to achieve their targets and succeed in their goals.

Every student will have ICT skills that are required by colleges, higher education and in the work place so that they have the opportunity to take up new and exciting roles.

The school will give staff and students access to a range of innovative ICT resources to enhance teaching and learning. New technologies will be investigated and used where appropriate.

Every member of staff will use ICT competently and confidently in their lessons when appropriate to improve teaching and learning and to assist in planning, preparation, assessment, recording and reporting.

Every member of the school will feel safe using the technology as they will have been trained and taught the dangers associated with using ICT and adequate safe guards will have been put in place by the school.

Every member of the school will acknowledge and seek to reduce the environmental impact of using the technology.

Every student will achieve level 5 or higher at Key Stage 3 and achieve a Level 2 qualification in ICT.
